OSCAR MENDIVIL GUTIÉRREZ

Junior Software Developer | AI Engineer
Mexicali, B.C., Mexico | omendivilg@gmail.com | 686-196-9697 | linkedin: Oscar Mendivil Gutierrez

PROFESSIONAL PROFILE

Computer Science Engineer with hands-on experience delivering full-stack business applications and building effective AI-assisted development workflows. Skilled in structuring project context, breaking complex requirements into clear tasks, and guiding AI models through planning, implementation, and debugging. Able to adapt these workflows across projects, technology stacks, and AI models while maintaining ownership of technical decisions, code review, testing, and validation. Combines practical experience with React, TypeScript, NestJS, and SQL databases with a strong foundation in Python, machine learning, and generative AI to build reliable software and automate business processes.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | SPL Audio e Iluminación Mexicali, B.C. *Aug 2026*

- Designed a structured AI-assisted development workflow, organizing project context, breaking requirements into actionable tasks, and guiding AI models through planning, implementation, and debugging. Reviewed and tested generated code while owning architectural and technical decisions.
- Built a React, TypeScript, and Tauri CRM with NestJS, PostgreSQL, and REST APIs, centralizing clients, events, scheduling, finances, and business dashboards.
- Managed delivery from requirements and database design through deployment, containerizing backend services with Docker and deploying them to Fly.io.

Software Developer | Coto Technology Mexicali, B.C. *Jan 2026 - Jun 2026*

- Led FileMaker-to-SQL Server modernization, designing the relational data model and ETL pipelines to support a scalable multi-user architecture.
- Documented system boundaries and architecture with the C4 Model, clarifying the design for stakeholders and the development team.
- Optimized SQL queries and data workflows to remove legacy bottlenecks and reduce response times in the modernized system.

Software Developer Intern | MIURA Mexicali, B.C. *Mar 2024 - Aug 2024*

- Built a C# business-reporting application that automated report generation and reduced manual processing time by 70%.
- Designed database extraction and data-processing pipelines to streamline business analysis and provide information for decision-making.

IT Intern | Skyworks Solutions Mexicali, B.C. *May 2025 - Sep 2025*

- Improved internal IT workflows to support operational continuity in a high-demand manufacturing environment.
- Resolved team technical blockers and promoted software development best practices.

EDUCATION

CETYS Universidad - B.S. in Computer Engineering (Computer Science), Mexicali, B.C. *Aug 2022 - June 2026*
Awards: "Best of the West" - The OATHE Project Hackathon (2025) · NASA Space Apps Challenge (2023, 2024)

CERTIFICATIONS

Artificial Intelligence Fundamentals - IBM · Career Essentials in Generative AI - Microsoft & LinkedIn · Product Ownership - Aimo Labs · Python and C# - Sololearn

SKILLS

Development: React, TypeScript, JavaScript, Node.js, NestJS, Tauri, REST APIs, Python, C#, AI-Assisted Development
AI & Data: AI Workflow Design, Prompt Engineering, Generative AI, PostgreSQL, SQL Server, SQL, Relational Data Modeling, ETL
Cloud & Engineering: Docker, Fly.io, Git, CI/CD, Software Architecture, C4 Model
Code Quality: Debugging, Unit Testing, AI-Generated Code Review and Validation
Languages: Spanish (Native), English (C1)
